

# 2013 FALL PREVENTION CAMPAIGN

PLAN PROVIDE TRAIN

## Residential Construction Fall Protection in Kentucky

Employers must comply with federal fall protection standards except during certain limited residential construction activities.

The limited activities are:

- Unprotected sides & ledges;
- Leading edges;
- Hoist areas;
- Form work and reinforcing steel;
- Roofing on slopes of 3 in 12 or less.

During these limited activities, employers may choose compliance options found in 803 KAR 2:412 that are not available in the federal standard.
