

KENTUCKY LABOR CABINET FALL PREVENTION CAMPAIGN

DON'T FALL FOR IT! Fall Protection for Steel Erection

STEEL ERECTION IN KENTUCKY

Fall protection requirements for steel erection in Kentucky are different than OSHA.

All steel erection activities in Kentucky are required to have and use fall protection for employees working 10 feet or more above a lower level.

These activities include work by connectors and employees working in controlled decking zones.

Fall protection includes the use of guardrail systems, safety net systems, personal fall arrest systems, and positioning device systems.

THEN and NOW
